UBE Elastomer Co. Ltd.

Commitment for ISCC PLUS

We, UBE Elastomer Co. Ltd. have obtained certification of ISCC PLUS (※ 1) at Chiba factory (Ichihara, Chiba) and Head office (Minato-Ku, Tokyo) in order to enhance our service of environmentally friendly products that produced by the mass-balance method (※ 2) for our clients.

We hereby confirm our commitment to be compliant for the latest requirement by ISCC PLUS.

President and Representative Director Hisaaki Yokoo

※ 1 : ISCC – International Sustainability and Carbon Certification (ISCC) is a certification system that offers solutions for the implementation and certification of sustainable, deforestation-free and traceable supply chains of agricultural, forestry, waste and residue raw materials, non-bio renewables and recycled carbon materials and fuels. ISCC PLUS is a certification system for all markets and sectors not regulated by the RED II (ISCC EU). ISCC PLUS covers mainly bio-based and circular raw materials, contributing to the Circular Economy and Bioeconomy.

※ 2 : Mass balancing is a chain of custody option in which certified and non-certified materials are mixed physically, but kept separate on a bookkeeping basis. It allows to attribute the sustainable circular and/or bio-based material to the final products via verifiable bookkeeping and ensures the full traceability through the entire supply chain.
