Ube Industries Announces Issue of Stock Acquisition Rights as Stock Options for Stock-Linked Compensation Plan

TOKYO, June 29, 2010— Ube Industries, Ltd., today announced that its Board of Directors today decided to offer the company’s directors (excluding external directors) and its executive officers stock acquisition rights allocated as stock options pursuant to the provisions of Articles 238 and 240 of the Company Law and also determined the solicitation of those who are to receive the said stock acquisition rights.

The aim of this move is to raise the motivation and morale to improve the Company’s share price and business performance by linking the compensation of its officers to the share price so that they share a greater common interest with the Company’s shareholders.

1. Name of the Stock Acquisition Rights to be Offered

Ube Industries Fiscal 2010 Stock-Linked Compensation Plan Stock Acquisition Rights

2. Total Number of Stock Acquisition Rights to be Offered

366 units

The above figure is the number scheduled for allotment. If the total number of Stock Acquisition Rights is reduced due to less application for subscription, etc., the reduced number of Stock Acquisition Rights shall be the total number of Stock Acquisition Rights to be issued.

3. Type and Number of Shares That Are the Object of Stock Acquisition Rights

The type of shares that are the object of Stock Acquisition Rights shall be ordinary shares of the Company. The number of shares for each Stock Acquisition Right (“Number of Granted Shares”) shall be 1000 shares.

However, if a share-split (includes gratis allotment of ordinary shares of the Company, the same shall apply below regarding the descriptions of share-split) or a reverse share-split is conducted for ordinary shares of the Company after the allotment date, the Number of Granted Shares shall be adjusted by applying the following formula, with fractions of less

than one share rounded down to the nearest one share,

Number of Granted Shares after adjustment = Number of Granted Shares before adjustment × Ratio of share-split/reverse share-split

The Number of Granted Shares after adjustment shall be applied on or after the day following the record date thereof in case of a share-split, or from the effective date thereof, in the case of a reverse share-split.

However, if a share-split is made under the condition that a proposal to increase capital or capital reserve by reducing surplus shall be approved at a general meeting of shareholders, and if the record date of such share-split is set for a day prior to the close of said general meeting of shareholders, the Number of Granted Shares after adjustment shall be applicable retroactively on the day following the closing of the said general meeting of shareholders and thereafter, to the next day following such record date.

In addition to the above case, in the event that an adjustment of the Number of Granted Shares is appropriate after the allotment date, the Company shall carry out the adjustment deemed necessary.

If the Number of Granted Shares is to be adjusted, the Company shall notify the holder of each Stock Acquisition Right recorded in the Register of Stock Acquisition Rights (“Holder of Stock Acquisition Right”) of any important matters by the day immediately prior to the date on which the Number of Granted Shares after adjustment is applied. However, if the Company is unable to give such notice by the day immediately prior to the date for such application, such notice shall be given as soon as possible afterwards.

4. Amount of Assets Contributed on Exercise of Stock Acquisition Rights

The amount of assets contributed upon exercise of each Stock Acquisition Right is calculated by multiplying the paid-in value of 1 yen per share delivered upon exercise of each Stock Acquisition Right by the Number of Granted Shares.

In this case, the Company shall grant the holders of the said Stock Acquisition Rights, in exchange for the said Stock Acquisition Rights, a cash amount calculated by multiplying the option price per share calculated using the following formula by the Number of Shares Granted (Number of Shares Granted after adjustment in the case of adjustment in accordance with provision 3 above).

Option price per share = Closing price (base price on the next trading day when there is no closing price) of the ordinary shares of the Company in regular trading on the Tokyo Stock Exchange on the date of the general meeting of shareholders of the Company that approved said proposal (resolution of the Board of Directors of the Company when the resolution of the general meeting of shareholders is not required) – 1 yen
